

Sprint 3 Plan

Goal:

The goal of sprint 3 is to implement appointment system and medical record system.

Task Listing:

- **As a receptionist, I want to be able to see patient's basic information and appointment request so that I can help him/her to schedule.**
 - Estimated story points: 8
 - Designing view UI of full appointment page using calendar api (**Adam**)
 - Time estimate: 3 hours
 - Designing view UI of request page (**Howard**)
 - Time estimate: 3 hours
 - Create a search function for users(Full appointment page)
 - Time estimate : 3 hours (**Adam**)
 - Have an “inbox” tab of requests and when opening requests, accept or reject them. If accepted, add to database (request page)
 - Time estimate: 4 hours (**Zhaoheng**)
 - Create search function on calendar to see certain users events (Full appointment page)
 - Time estimate: 3 hours(**Adam**)
- **As a receptionist, I want to be able to schedule an appointment manually so that I can make an appointment for someone who is not using mobile app and update the information in appointment system for all users.**
 - Estimated story points: 8
 - Set up appointment creation page/form (**Adam**)
 - Time estimate: 4 hours
 - **SPIKE**: Using calendar api (**Adam**)
 - Time estimate: 3 hours
- **As a user, I want to be able to cancel or rearrange my appointments so I can be flexible**
 - Estimated story points: 5

- Design cancel button (**Zhaoheng**)
 - Time estimate: 2 hours
 - Design rearrange UI (**Howard**)
 - Time estimate: 2 hours
 - Update the information in database and have receptionist be notified. (**Zhaoheng**)
 - Time estimate: 2 hours
-
- **As a patient, I want to be able to check my medical records for my own personal use.**
 - Estimated story points: 8
 - Create a block inside profile page that linked to medical record page (**Zhaoheng**)
 - Time estimate: 2 hours
 - Set up the database by creating a new collection called “history” for each user (**Vineet**)
 - Time estimate: 2 hours
 - Design the medical record page with detailed information including date, location, doctor’s name, brief description and prescription information (**Vineet**)
 - Time estimate: 2 hours
-
- **As a doctor, I want to be able to check the patient’s medical records so that I can know if there is any information that is valuable.**
 - Estimated story points: 8
 - Check the permission of user before link to another page(**Howard**)
 - Time estimate: 2 hours
 - Link to different patient’s medical records when clicking on the upcoming appointment in medical homepage (**Zhaoheng**)
 - Time estimate: 2 hours

- **As a doctor, I want to be able to write the patient's medical records so that the patient's medical records can be updated officially by a doctor.**
 - Estimated story points: 8
 - Check permissions of user before they can edit the records (**Andrew**)
 - Time estimate: 1 hours
 - Change the data and hit submit (Text input + button) (**Andrew**)
 - Time estimate: 2 hours
 - Have the change be stored in firebase (**Andrew**)
 - Time estimate: 2 hours

Team roles:

Zhaoheng Chen (Jeffrey): Product Owner {Developer}

Andrew Hartwell: Scrum Master {Developer}

Howard Ng: Developer

Vineet Ramareddi: Developer

Adam Askari: Developer

Backlog:

- **As a doctor, I want to restrict patients' ability to write their medical records by themselves.**
 - Estimated story points: 5
- **As a patient, I want to make sure my medical records are only available to my doctor.**
 - Estimated story points: 5

Initial task assignment:

Each task is assigned to the following member in task list.

Initial burnup chart:
