

Sprint 1 Report

Actions to stop doing:

One thing we can stop doing is making our branch names less vague. The team should make branch names related to the user task they are working on.

Actions to start doing:

Start doing scrum meeting for every meeting.

Make our posts on the clubhouse be user tasks rather than user stories.

Actions to keep doing:

Keep learning Javascript/React Native framework.

Work on tasks daily and not leave them to the past minute.

Keep completing every user story.

Keep communicating with other team members outside of meetings about progress.

Work completed:

- As a developer, I want to be familiar with the frameworks I choose so that I know what I have to work with when writing new features.
- As a user, I want to choose my account type automatically so that I can sign up as a patient or as a medical staff
- As a user, I want to have a forgot password button so that I can reset my password
- As an administrator, I want to manage permission to the medical staff account so that I can give or remove permission of medical staff account.
- As a user, I want to have access to the main menu so that I can see my options

Work not completed:

None

• **Work completion rate:**

Total number of user stories completed: 5

Total number of estimated ideal work hours completed: 40

Total number of days: 7

User stories/day: 0.5

Ideal work hours/day: 1-2(for each group member)
